Profile

Python Backend Developer skilled in building web applications using Django and working with database-driven solutions. Familiar with backend development concepts, database operations, and implementing data-driven features. Strong focus on writing clean, efficient code and solving real-world problems through backend logic. Seeking an entry-level Python Backend or Django Developer role to contribute to impactful projects while continuously expanding technical expertise.

Technical Skills

Languages: Python, SQL
Frameworks: Django
Database: MySQL, SQLite
APIs & Concepts: REST APIs, OOP, Authentication (Session/JWT)
Libraries: Pandas, NumPy
Tools: Git, GitHub, VS Code, PyCharm

Education

Bachelor of Engineering (Computer Engineering) CGPA: 7.61/10 Aug 2023 – June 26
Shree Swaminarayan Institute of Technology, Ahmedabad

Diploma in Computer Engineering CGPA: 8.45/10 Jul 2020 – Apr 2023
Government Polytechnic, Himatnagar

Projects

Woox Travel —Travel Booking System

- Developed backend functionality for a travel booking platform using Django.
- Implemented booking workflows, dynamic travel package filtering, and price calculation features.
- Managed user, booking, and travel-related data using SQLite and Django ORM.
- Integrated frontend templates with Django backend to enable seamless data processing and user interactions.
- Utilized Django models, views, templates, and authentication features for application development.
- **Tech Stack:** Python, Django, SQLite3

Job Portal — Recruitment Management System

- Developed a role-based Job Portal using Django with separate Recruiter and Candidate user workflows.
- Built job posting, job search, and job application management functionalities using Django ORM and ModelForms.
- Developed applicant tracking features, including recruiter-side application review and status management workflows.
- **Tech Stack:** Python, Django, SQLite3, Bootstrap 5, HTML, CSS

Internship

Python Backend Developer Intern — Xipra Technology Jan 2026 – Mar 2026

- Assisted in developing backend functionality for web applications using Python, Django, and SQL.
- Worked with Django models, views, templates, and authentication features.
- Performed database operations using Django ORM with SQLite and MySQL.
- Improved debugging, code structuring, and backend development practices.
- Collaborated with team members during development and project implementation.

Certificates

- **Generative AI & Prompt Engineering Mastermind** – Outskill Track
- **Programming with Python** – Simplilearn
- **Python and Django** - SkillUp
